

## Recording Audio to an Adobe Presenter Presentation

Adobe Presenter allows you to add audio to each of the slides in your PowerPoint presentation. Below are instructions that enable you to add audio to the slides in your PowerPoint presentation.

To record audio to your slides with **Adobe Presenter**:

1. Open your narrated presentation in PowerPoint. Note that this step is not necessary if your presentation is already open.
2. Click the **Adobe Presenter** tab (Figure 1). The **Adobe Presenter** commands are displayed.

Figure 1

3. Click the **Record** command (Figure 2). The **Adobe Presenter-Record Audio** dialog box opens (Figure 3).

4. Click the **Stop Recording** button when you are done with your recording.

Figure 4

5. Click the **OK** button (Figure 5). The **Adobe Presenter-Record Audio** dialog box disappears. Note that these instructions allow you to record one slide at a time. If you wish to generate a continuous recording, uncheck the check box **Record/Play this slide only**. When you are done recording the current slide, click the **Next** button to proceed to the next slide to continue your recording. Click the **OK** button when you are done.
