

Canvas How-to Guides for Faculty

Add the Course Resources Module to the Course Home Page

1. From the course home page, click “Add a New Module” from the menu on the right.

2. Name the module “Course Resources”, then click “Add Module”.

3. The new empty module will appear. This module will contain your course syllabus and links to any other general resources that students may need, e.g., a link to APA formatting instructions.
