Table Relationships

Table relationships are the associations of data between tables. By defining table relationships, you can pull records from related tables based on matching fields.

Creating Table Relationships
To create relationships between tables:

- Click the **Database Tools** tab on the Ribbon
- Click the **Relationships** button
• Click on the **Design** tab
• Click **Show Table**

Select the desired tables

• Click **Add**
• Click **Close**
- Click the field you wish to create a relationship from
- Drag it to the matching field in the other table
- Click **Create**
